PRODUCT REQUIREMENTS DOCUMENT

VYUHA — AI & ML ASSOCIATION WEBSITE

Inauguration Edition • 2026

1. Product Overview

Vyuha is an AI and Machine Learning student association website designed to serve as the association's digital identity from its inauguration onward. The first release should focus on identity, vision, people, learning, and future activities rather than statistics or historical achievements.

2. Product Goals

- Create a distinctive digital identity for Vyuha using the black-and-gold visual language of the official logo.
- Introduce the association and explain its purpose, vision, and areas of interest.
- Showcase faculty coordinators, leadership, executive committee, and student members.
- Provide a foundation for future events, projects, research, resources, and achievements.
- Create an immersive, modern website with subtle cinematic scroll animations.
- Make the website easy to update as the association grows.

3. Target Users

- AI & ML students and other students interested in technology.
- Faculty members and department staff.
- Guests and participants attending association events.
- Potential speakers, mentors, collaborators, and industry contacts.
- Future students who want to understand the association.

4. Brand & Visual Direction

- Primary background: near-black (#050505).
- Primary accent: metallic/warm gold inspired by the Vyuha logo.
- Text: white/off-white with muted gray secondary text.
- Use the supplied Vyuha logo as the primary visual identity.
- Visual language: premium, technological, strategic, minimal, cinematic.
- Use thin circuit-like lines, subtle glows, geometric rings, and restrained motion.
- Avoid generic blue/purple AI gradients and excessive visual effects.
- Typography should combine a strong display face for headings with a clean sans-serif for body text.

5. Information Architecture

- Home / Hero
- The Beginning
- Our Vision
- The People

- What We Explore
- What We Do
- Events
- Projects
- Resources
- The Road Ahead
- Join Vyuha
- Footer

6. Homepage Requirements

6.1 Hero — Vyuha

- Full-screen opening section.
- Display the Vyuha logo prominently.
- Display 'VYUHA' and 'AI & ML ASSOCIATION'.
- Optional tagline: 'Where curiosity becomes intelligence.'
- Show inauguration year: 'EST. 2026'.
- Include a clear scroll indicator.
- Use an elegant logo reveal and subtle background motion.

6.2 The Beginning

- Headline: 'A NEW CHAPTER BEGINS'.
- Briefly explain what Vyuha is and why it exists.
- Emphasize that the association is starting in 2026.
- Do not display member counts, project counts, rankings, or other invented statistics.

6.3 Our Vision

- Present the core philosophy using large typography: 'LEARN. EXPERIMENT. BUILD. SHARE.'
- Explain the goal of creating a space for AI/ML exploration beyond classroom learning.
- Keep copy concise and student-focused.

6.4 The People — Members

- Dedicated member directory section.
- Categories: Faculty Coordinators, Leadership/Core Team, Executive Committee, Student Members.
- Member cards should include photo, name, role, year/branch where appropriate, and optional social links.
- Cards should have subtle gold hover/circuit effects.
- Allow future filtering or grouping by role/year.
- Do not require a total member statistic.

6.5 What We Explore

- Artificial Intelligence
- Machine Learning
- Deep Learning
- Computer Vision
- Natural Language Processing

- Generative AI
- Robotics and related emerging technologies

6.6 What We Do

- Workshops
- Technical talks
- Projects
- Research and paper discussions
- Hackathons and competitions
- Peer learning and mentorship
- Industry interaction

6.7 Events

- Feature the inauguration as the first major event.
- Include event date, title, description, venue/details, and optional poster.
- Create a structure that can later become a chronological event archive.
- Future events should be addable without redesigning the page.

6.8 Projects

- Introduce the project area without claiming completed projects on launch.
- Suggested launch copy: 'The first idea is waiting to be built.'
- Future project entries should support title, description, team members, technologies, GitHub/demo links, and project image.

6.9 Resources

- AI/ML learning roadmaps
- Documentation and tutorials
- Research papers
- Datasets
- Useful tools
- Internship and competition opportunities
- Resources should be expandable over time.

6.10 The Road Ahead

- Present Vyuha's future as an evolving timeline rather than an achievements list.
- Start with '2026 — Vyuha begins'.
- Leave future milestones open for workshops, projects, research, competitions, and collaborations.
- Use the concept: 'The future is unwritten.'

6.11 Join Vyuha

- Strong final call to action: 'BUILD THE FUTURE WITH US.'
- Provide a 'JOIN VYUHA' button.
- Registration fields may include name, year, branch, email, areas of interest, and optional GitHub/LinkedIn.
- The registration system may initially use an external form if a backend is not ready.

7. Navigation

- Desktop navigation should remain minimal: About, Members, Explore, Events, Projects, Resources, Join.
- Use a compact mobile menu.
- The Vyuha logo should return users to the hero/home.
- Navigation should support smooth scrolling for homepage sections.

8. Animation & Interaction Requirements

- Use GSAP + ScrollTrigger if a JavaScript animation library is acceptable.
- Hero logo: fade/scale reveal.
- Background elements: slow, subtle movement.
- Section headings: staggered entrance on scroll.
- Large typography may scale or move during scroll.
- Member cards: subtle hover elevation, gold border/glow, or circuit-line reveal.
- Event/project cards: image reveal or horizontal movement.
- Transitions should feel cinematic but remain fast and accessible.
- Avoid excessive animation that hurts readability or performance.
- Respect prefers-reduced-motion for users who disable motion.

9. Technical Requirements

- Responsive design for desktop, tablet, and mobile.
- Recommended initial stack: HTML, CSS, JavaScript, GSAP/ScrollTrigger.
- React/Next.js is optional and not required for the first version.
- Use optimized WebP/AVIF images where possible.
- Use semantic HTML and accessible buttons/links.
- Ensure keyboard navigation and readable contrast.
- SEO title: 'Vyuha — AI & ML Association'.
- Add appropriate meta description and social sharing metadata.
- Use a simple data structure/JSON or CMS-ready structure for members and events so content can be updated easily.

10. Launch Content

- Official Vyuha logo.
- Association name and department/institution details.
- Inauguration information.
- Verified faculty and student leadership information.
- Member photographs and roles where permission has been obtained.
- Official social/contact links.
- Vision and association description approved by the association.

11. Explicitly Excluded From Launch

- Member-count statistics.
- Project-count statistics.

- Achievement/ranking statistics.
- Unverified claims about partnerships or industry connections.
- Fake testimonials.
- Invented events or completed projects.
- Claims that imply an established track record before the association's launch.

12. Future Expansion

- Admin-managed member directory.
- Event registration and attendance.
- Project submission system.
- Research/paper repository.
- Announcements/news.
- Alumni section.
- Member login/profile pages.
- Certificate/event archive.
- Association newsletter.
- Analytics dashboard for administrators.

13. Success Criteria

- A visitor understands what Vyuha is within the first 10 seconds.
- The inauguration is clearly presented as the association's beginning.
- Members and leadership are easy to discover.
- The website feels technically sophisticated without being visually cluttered.
- The site works smoothly on mobile and desktop.
- New events, members, projects, and resources can be added without changing the overall design.

14. Suggested Launch Copy
